

SLIDE BAR CLIP-ONS

DURABILITY

Our Slide Bars are made from high grade Austenitic 301 rolled stainless steel for excellent durability and wear life.

ACCURATE PROFILING

RDSA's rolling process ensures accurate profiling, providing excellent fit and retention.

CUT TO LENGTH

All Slide Bars can be cut to length to suit customer requirements. RDSA Slide Bars are etched at both ends to aid identification if the slide bars are later cut to shorter lengths.

FAST TURNAROUND

RDSA carries stock of Clip-Ons to ensure fast turnaround times and rapid supply.

PACKAGED SHIPPING

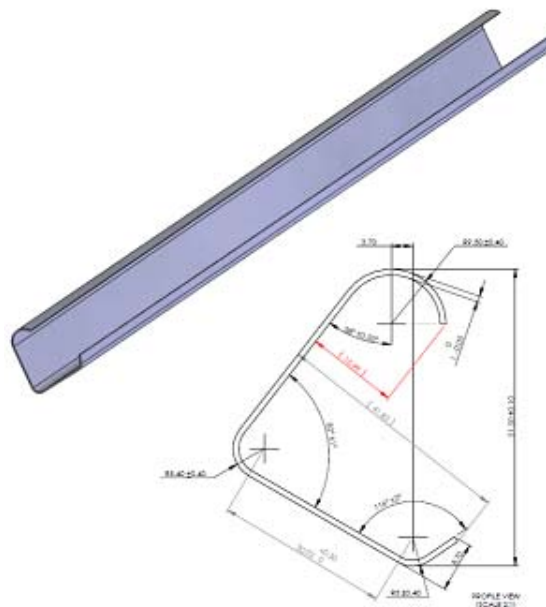

Slide bars are packaged for transport in custom made wooden crates to avoid damage and for ease of handling.

To Suit Atlas Copco 6000 Series Feed Beams

RDSA supplies well priced, high quality Slide Bar Clip-Ons to suit 6000 Series Feeds, manufactured at our Heidelberg production facility in Melbourne. Made from high grade rolled stainless steel, our Clip-Ons provide excellent durability and wear life for use in underground drilling operations.

RDSA Clip-Ons are accurately profiled to ensure excellent fit and retention that can be cut to length to suit customer requirements. We carefully package our Clip-ons in either custom made wooden shipping crates or PVC tubing for ease of handling and to avoid damage during transport.
